

Yezequelian residence, a nice choice for every guest

By Yelena Martynova

Summer is the time of holidays and traveling. And the first question emerging among tourists after the place of travel is chosen, is that of place to stay. The choice is not so wide: either hotels or motels, or apartments for rent.

However, lately the tourists visiting Armenia have got another alternative - the Yezequelian residence complex.

The Yezequelian residence, situated in Khorenatsi 1 near the Congress hotel, attracts attention with bright colors of its facade. The interior of the complex's rooms is no less attractive: comfortably furnished one, two and three-bedroom rooms have open balconies facing the park surrounding the complex, or the mountain Ararat. In general, each room is a small apartment with all the conveniences, in which, as in every apartment, there is a bathroom with running hot and cold water, a dining room, a bedroom and a kitchen. It's natural that each room is equipped with consumer electronics: conditioner, TV set and DVD player, Wi-Fi internet, as well as refrigerator and gas stove. Besides all these, there are also washing and dish washing machines in the three-bedroom rooms (in contrast to the two-bedroom ones, here the kitchen is separated from the dining room).

There is also a safe in each room.

In front of the building, which by the way is under 24 hour control, there is a small park with asphalt walks and small tables where the guests can have a nice time with a cup of coffee. By the way, there is a so-called cafe on the first floor, for those who want a cup of coffee. It's a small comfortable and very light room where the guests can have breakfast. The "Cafe" of the Yezequelian residence in fact reminds a kitchen of a modern apartment: the refrigerator, the soft angular sofa around the table, the boxes with accurately arranged dishes really create an atmosphere of home. The small stand with alcoholic drinks, apparatus for making expresso coffee as well as small choice of cold drinks are always at the visitors' service (but only for additional price). Pictures with images of flowers and with city landscapes (views of Armenia and France) hang all over the walls of this small cafe. Later, as the manager of the complex, Shaq, Stepanian-Soujian explained us that the authors of these pictures are the employees of this complex.

The Yezequelian residence also offers its constant customers and guests an asphalt ground for parking the cars. A small territory with green grass-plot is envisaged for the customers with children, where

children can play. Child's swings are put here for small guests.

The complex works only 3 months, however, during this time it has already gained constant customers, among whom employees of embassies of different countries, professors of the French University are. Such popularity is not surprising - the Yezequelian residence is not inferior to any hotel in terms of the comfort of its rooms. However, the cost of these rooms is significantly lower as compared with analogous rooms in hotels. A 15 days stay in such room costs the guests 500 dollars. Another interesting peculiarity of the complex is that the cost of the rooms does not depend on the quantity of its pieces. All the rooms have a stable fixed price.

To become a guest of this wonderful house-hotel is rather easy. You have to phone or to email its owners and mention the time and date of your arrival. The hospitable owners themselves will meet you at the airport and bring to "hotel".
